

Education

Bachelor of Science in Computer Science

San Francisco State University

May 2025

San Francisco, CA

Skills

Languages: JavaScript, TypeScript, C#, SQL, HTML/CSS

Frameworks & Engines: React.js, Next.js, Node.js, Express.js, Unity

Databases & Technologies: PostgreSQL, MongoDB, Prisma, Google Cloud, Cloudflare R2, Docker, Git, WebSockets

Projects

JobHazel — Full-Stack Job Application Tracker | [GitHub](#) · [Live App](#)

Mar 2026 – Present

Next.js, React.js, TypeScript, Node.js, Express.js, PostgreSQL, Prisma

- Built and launched a job app tracker with interactive kanban boards, pipeline visualizations, and analytics.
- Implemented job importing from posting URLs and a Chrome extension for one-click application capture.
- Engineered resume management with Cloudflare R2 uploads, file validation, and version tracking.
- Secured the app with JWT authentication, user-scoped access, and DB transactions for data consistency.
- Built unit, integration, and E2E tests covering job parsing, authentication, and resume workflows.

Destructible Structure Builder — Unity Developer Toolkit | [Product Page](#)

Jun 2025 – Present

Unity, C#

- Built and published a toolkit for creating destructible structures with custom 3D tools inside the Unity editor.
- Designed a graph-based structural model where damage/lost support dynamically triggers cascading collapse.
- Added automated tests for structure-building tools and runtime destruction to catch regressions.
- Developed a developer-facing API, documentation, and video tutorials for easy integration into other games.

Aspiro — Full-Stack Athlete-University Matching Platform | [GitHub](#)

Aug 2024 – Dec 2024

Next.js, React.js, Express.js, SQL, Google Cloud

- Led backend development on a six-person team, building APIs, SQL models, and deploying to Google Cloud.
- Built a ranking algorithm using 5,000+ Olympian records to score universities by sport, medal, and recency.

The Backrooms: Unseen Tapes — Commercial Unity Game | [Product Page](#)

Jan 2023 – Jun 2024

Unity, C#

- Developed, published, and supported a commercial horror game on Steam, achieving 500+ sales.
- Implemented stealth mechanics, procedural generation, and optimized scenes with 10,000+ lights & objects.

Texas Hold'em — Full-Stack Online Poker Platform | [GitHub](#)

Jan 2023 – May 2023

Node.js, Express.js, WebSockets, PostgreSQL

- Built backend poker logic for betting, turns, hand evaluation, and chip balances as part of a four-person team.
- Designed and implemented Socket.IO rooms to synchronize real-time gameplay and chat across poker tables.

Additional Experience

Sprouts Farmers Market — Grocery Clerk

Mar 2026 – Present

Whole Foods Market — Grocery Team Member

Mar 2023 – Feb 2024
